

ARC T2 190A DC @35% duty cycle

Think it's the same as a WP26 - you'd be wrong.

It's the same size as a WP17 but with 30% more power and better performance than a WP26

- **Longer Lasting Consumables**

Ceramics last 5 x longer

Gas Lens Bodies last 20 x longer

Back Caps last 10 x longer

Collet Bodies last 10 x longer

- **Quartz Cups**

Provides optimum view for tungsten positioning and weld puddle visibility.

- **No More Twisting**

New one piece collet body system.

- **Tungsten Release System**

Simply twist and tap.

Don't take our word for it, watch the video and see the benefits of the T2.

The Arc T Series rewrites the rules, delivering unsurpassed performance and wear parts durability.

This is not business as usual!
